# Wrapping Tube Cable (WTC<sup>™</sup>) with 12 Fiber Spider Web Ribbon (SWR<sup>™</sup>) Outdoor WTC<sup>™</sup> 144 – 6912F

The Wrapping Tube Cable (WTC<sup>™</sup>) with Spider Web Ribbon (SWR<sup>™</sup>) is an ultra-high density outside plant cable designed for fiber-to-the-home (FTTH), access markets, and data centers. It complies with the latest outside plant cable standard, Telcordia GR-20. WTC<sup>™</sup> with SWR<sup>™</sup> offers the smallest cable diameter and lowest weight among high-fiber count ribbon cables in the industry. It is available in fiber counts ranging from 144 to 6,912.

SWR<sup>™</sup> is an intermittent bonded ribbon fiber design allowing for either a highly efficient ribbon splicing or an individual fiber breakout splicing process. With the ability to roll and conform, the SWR<sup>™</sup> provides ultra high density fiber packaging in the WTC<sup>™</sup>.

# Wrapping Tube Cable (WTC<sup>™</sup>) with 12 Fiber Spider Web Ribbon (SWR<sup>™</sup>) Armored Outdoor WTC<sup>™</sup> 24 – 864F

The Wrapping Tube Cable (WTC<sup>™</sup>) with Spider Web Ribbon (SWR<sup>™</sup>) is an ultra-high density outside plant cable designed for fiber-to-the-home (FTTH), access markets, and data centers. It complies with the latest outside plant cable standard, Telcordia GR-20. WTC™ with SWR™ offers the smallest cable diameter and lowest weight among high-fiber count ribbon cables in the industry. It is available in fiber counts ranging from 24 to 864.

SWR™ is an intermittent bonded ribbon fiber design allowing for either a highly efficient ribbon splicing or an individual fiber breakout splicing process. With the ability to roll and conform, the SWR™ provides ultra high density fiber packaging in the WTC<sup>™</sup>.

Armored Outdoor WTC™ provide extra protection and durability in harsh environments. Encased in a robust corrugated steel armor, these cables are resistant to physical damage, moisture, and other external factors. Ideal for industrial settings and outdoor installations, armored cables offer reliable and long-lasting connectivity for critical applications.

# Wrapping Tube Cable (WTC<sup>™</sup>) with 12 Fiber Spider Web Ribbon (SWR<sup>™</sup>) Indoor, Indoor/Outdoor WTC<sup>™</sup> 144 – 6912F

The Wrapping Tube Cable (WTC<sup>™</sup>) with Spider Web Ribbon (SWR<sup>™</sup>) is an ultra-high density cable designed for fiber-to-the-home (FTTH), access markets, and data centers. WTC<sup>™</sup> with SWR<sup>™</sup> offers the smallest cable diameter and lowest weight among high-fiber count ribbon cables in the industry. It is available in fiber counts ranging from 144 to 6,912.

SWR<sup>™</sup> is an intermittent bonded fiber ribbon design allowing for either a highly efficient ribbon splicing or an individual fiber breakout splicing process. With the ability to roll and conform, the SWR<sup>™</sup> provides ultra high density fiber packaging in the WTC<sup>™</sup>.

Indoor, Indoor/Outdoor WTC<sup>™</sup> are compliant to requirements of both the European construction products regulation (CPR) and the North American standard UL. This incorporates the leading-edge Spider Web Ribbon technology in a robust, flame-retardant cable package that can be used within buildings and, because of the core water-blocking feature, can also be routed outside provided the cable is housed within covered pathway spaces including duct-banks and cable trays.

#### Features

- UV Resistant (for Indoor/Outdoor)
- Full dry (gel-free) construction
- Mid Span Access
- Fully dielectric
- OFNR-ST1
- CPR Certified
- Splicing compatibility with 250µm Ribbon

# Wrapping Tube Cable (WTC<sup>™</sup>) with 12 Fiber Spider Web Ribbon (SWR<sup>™</sup>) Air Blown WTC<sup>™</sup> 48 – 864F

The Wrapping Tube Cable (WTC<sup>™</sup>), with Spider Web Ribbon (SWR<sup>™</sup>), is an ultra-high density outside plant cable designed specifically for fiber-to-the-home (FTTH), access markets, and hyperscale data center. Ultra-high density and a new ribbon technology called Spider Web Ribbon, WTC provides the smallest cable diameter and lowest weight, high-fiber count ribbon cable in the industry. WTC<sup>™</sup> with SWR<sup>™</sup> cables are available in fiber counts from 48 to 864.

SWR<sup>™</sup> is a bonded fiber ribbon design allowing for either a highly efficient ribbon splicing or an individual fiber breakout splicing process. With the ability to roll and conform, the SWR<sup>™</sup> provides ultra high density fiber packaging in the WTC<sup>™</sup>.

Air Blown WTC<sup>™</sup> is designed for easy installation using air blowing installation method. These cables have a lightweight and flexible construction, allowing them to be blown through pre-installed microducts or tubes. The compressed air creates a pathway for the cable, eliminating the need for traditional cable pulling methods. This technology enables quick and efficient deployment of fiber optic networks, saving time and reducing installation costs.

#### Features

- Air blown installation
- UV Resistant
- Full dry (gel-free) construction
- Fully dielectric
- Splicing compatibility with 250µm Ribbon
- Mid Span Access
